Ranger Series Sand Filters are the preferred choice for above-ground and in-ground swimming pools. Available in sizes from 200 to 650 pound sand capacities, they are truly a carefree, economical answer to swimming pool filtration. The blow-molded one-piece tank is the heaviest in the industry. The 7-position valve makes operation and cleaning simple. Models with 2 inch valves feature full 2 inch internal plumbing with no reducers. Oversize laterals make filtration and backwashing more efficient.

25" Filter Features

- 25" tank
- 7 position valve
- 3.8 sq. ft. surface area
- 1½" or 2" valve
- 63 gal./min. or 80 gal./min. based on valve size
- Sand capacity – 300 lbs.

30" Filter Features

- 30" tank
- 7 position valve
- 4.6 sq. ft. surface area
- 2" valve
- 92 gal./min. or 115 gal./min. based on valve size
- Sand capacity – 500 lbs.

UNDERDRAIN

2" VALVE AVAILABLE WITH 25"
AND 30" TANKS

Ranger Sand Filters Are The Smart Choice. Easy, Durable, Reliable Filtration!

- Deep high-capacity sand bed traps more debris and extends filter cycles.
- Blow-molded tank is the heaviest in the industry - corrosion and UV-resistant.
- Large bottom drain port for quick winterizing and draining.
- Integrated diffuser is engineered to provide even water distribution across the sand bed for the most efficient filtration, preventing sand migration or channeling.
- Heavy-duty, Full Flow® Twist Lock Laterals are slotted a full 360°, not just on the sides or bottom, and are a full 1½" outside diameter to draw water evenly through the sand bed; resulting in higher flows, better filtration, less back pressure, and more efficient back washing.
- Exclusive Hub Assembly Design that is Stronger than Glued Assemblies.
- 7-Way Selector Valve with sight glass and pressure gauge
- Flow rates 20 gal./min. x sq. ft. with 1½" valve. 25 gal./min. x sq. ft. with 2" valve.
